## Personal Projects

### Ecommerce App

PHP, Mysql, HTML, CSS

- This PHP-based e-commerce platform allows users to log in securely, browse through a vast collection of music albums, and add their preferred items to the cart. It's a comprehensive solution that provides a seamless online shopping experience for music enthusiasts.

### Full Stack Mobile App

JAVA, PHP, Mysql

- This Android app, developed using Java, PHP, and MySQL, allows high school students to view upcoming activities, add new activities, and login securely. The app also enables users to delete activities as needed.

### Full Stack Web App

Reactjs, Nodejs

- A MERN (Mongodb, Express, Reactjs, Nodejs) app that allows users to login, ask and answer questions. Users can post questions and provide answers to others.

### Full Stack Web App (Memories)

Reactjs, Nodejs

- This MERN (Mongodb, Express, Reactjs, Nodejs) app allows users to create and store memories by adding pictures and descriptions. Users can also view and like memories created by themselves and others.
